## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1 - 12	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 12	YES
	Claims		NO
Industrial applicability (IA)	Claims	1 - 12	YES
	Claims		NO

### 2. Citations and explanations

1. The closest prior art is known, for example, from document US-B1-6185379 (D1). Document D1 is cited in the description.

A method according to claim 1 differs from the disclosure in document D1 in that the error conditions are compared with error patterns.

The effect of this difference is an improvement in error handling.

The problem addressed by the invention is that of realizing said effect.

The search report citations do not disclose any suggestion of the solution according to claim 1.

The device according to claim 12 has a control system that is well-suited to compare the error conditions with error patterns. Therefore, the subject matter of claim 12 demonstrates the same difference as claim 1.

2. Claims 2-11 are dependent upon claim 1 and thus likewise satisfy the PCT requirements with respect to novelty and inventive step.
